

G FIT 4S

Laufenn

Journey in Style

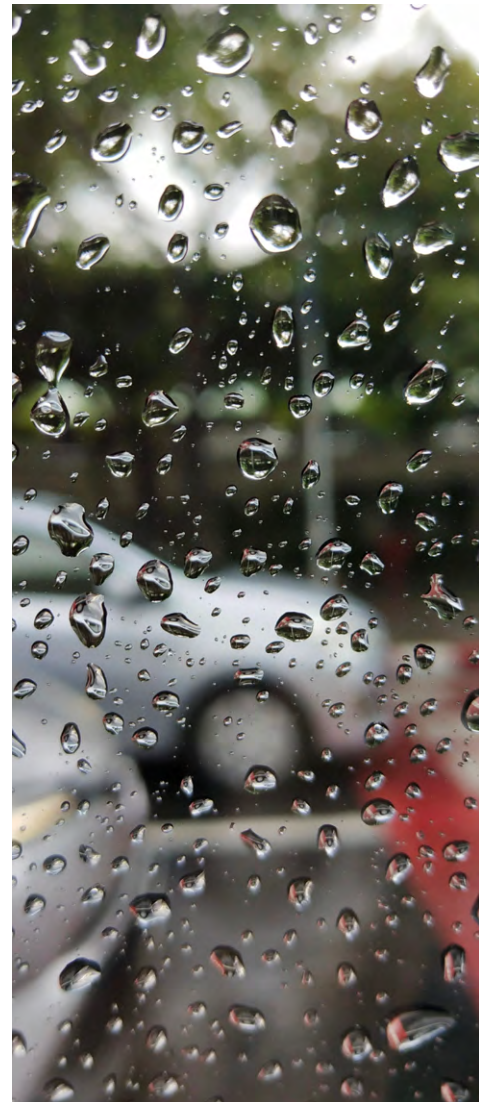

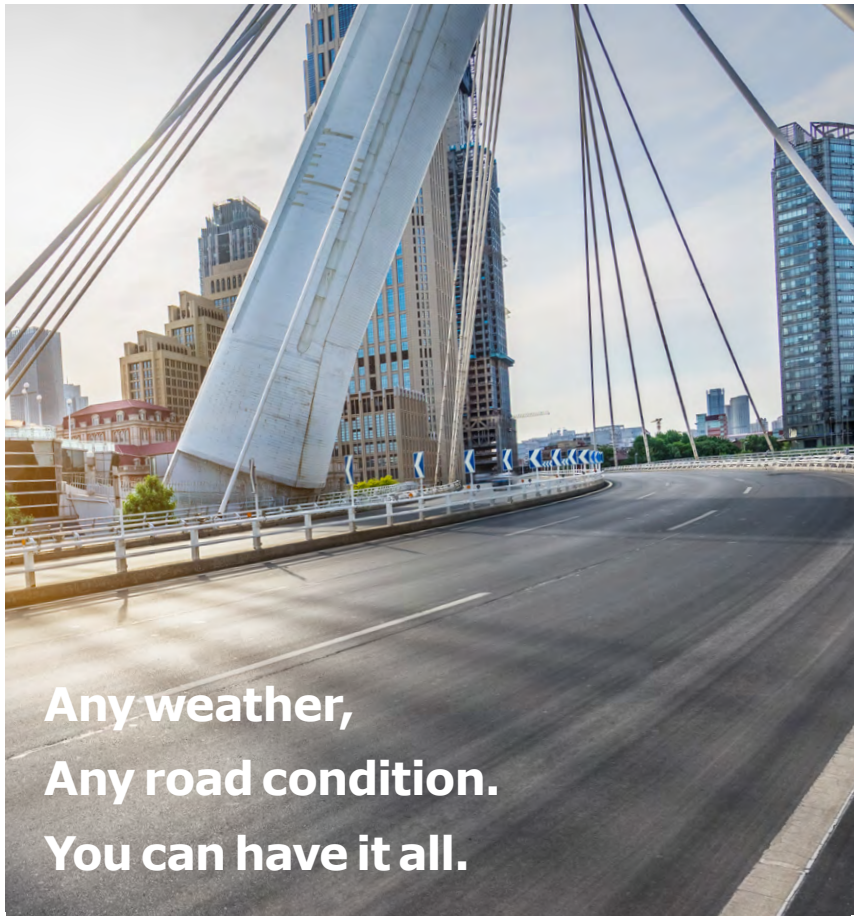

A Brand by Hankook Tire

Tire that fits

Laufenn is a life-fit brand tailor made for drivers who appreciate safety, innovation and value in their products. Created for people who are searching for excellent everyday performance with competitive prices. Simplicity, Quality, and Technology are what makes the brand unique; their great performance and minimalist design allow drivers to fit Laufenn tires to any make and model, and fulfill the need and lifestyle of customers around the world.

	S FIT Premium performance	 Wet	 Dry	 Handling	 Fuel Efficiency
	G FIT Touring	 Wet	 Dry	 Comfort	 Wear Life
	X FIT On/off road	 Durability	 Comfort	 Wear Life	 Off Road
	I FIT Winter	 Snow	 Wet	 Ice	 Traction

Multi Performance Tire

The G FIT 4S is the ideal choice for drivers looking for exceptional performance, value, and safety year-round.

Traction Comfort

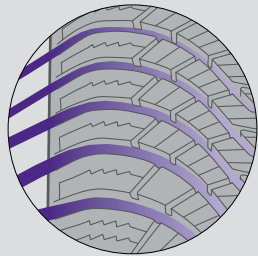

G FIT 4S	M+S 
Speed Symbol	H, V, W
S.W.	185~245
Series	40~70
Inch	15~20
UTQG	640 B A

- FEATURES**
- All-weather tire for all year round
 - Hybrid Performance (Dry, Wet & Snow)
 - High Grip Compound for any road condition
 - 3PMSF (Snowflake mark), M+S

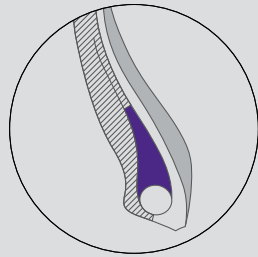

Handling

The G FIT 4S hybrid performance tire guarantees optimum handling in all weather and any road conditions.

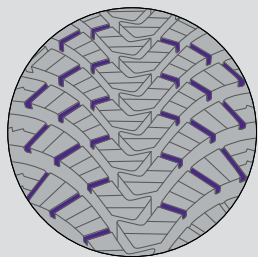

Wider Drainage Grooves

The uniquely streamlined aqua lateral grooves of the tire expand from the centre outwards in the contact area. This enhances drainage in snowy and rainy conditions, by expelling precipitation on the road away from the tire.

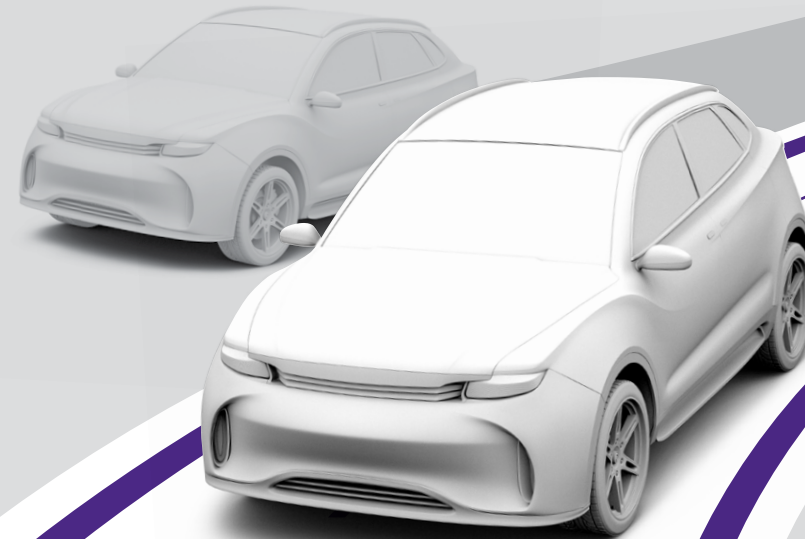

Optimized strong sidewall

Greater steering stability through the adoption of high-hardness bead filler with covered sidewall rubber. Strand bead wires improve uniformity and durability.

Angled Semi-Groove

Uniquely designed semi-grooves are applied to enable impressive steering at all angles. This also provides stable grip by maximizing the edge effect of the groove and the contact area on the road.

Mileage

Well-Balanced technology provides secure driving, from beginning to end, with long tread life.

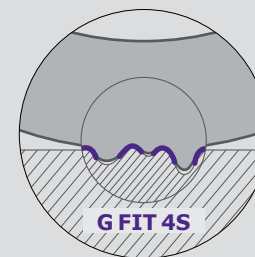

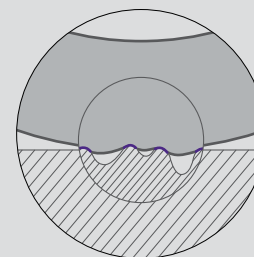

Even Tread Wear

By utilizing Convex TR (Tread Radius) technology, the grounding pressure for each rib block is uniformly distributed. This leads to a well-balanced contact shape that improves wear performance. The G FIT 4S tire utilizes Convex TR technology to achieve this result.

New Four-Season High Performance Compound

The new silica and performance resin compound improves wear and snow performance by maintaining flexibility, even in situations where the rubber of a tire becomes hard and loses its flexibility due to cold temperatures or braking.

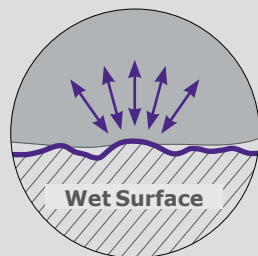

G FIT 4S

Grip control on Wet Roads

The G FIT 4S provides optimal grip control on wet roads, ensuring safe and reliable driving performance in wet conditions.

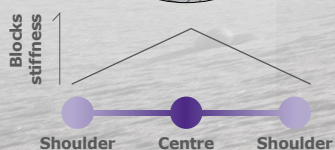

Performance Resin Compound

Performance resin compound is applied to provide excellent wet grip performance even in wet road conditions.

Interlocking Centre Block

The blocks interlocked in the centre of the tire provide block stiffness and rigidity, resulting in stability, comfort, and control for drivers

Winter performance

The G FIT 4S provides reliable and safe driving performance even in winter. This is proven by certification mark on winter regulations.

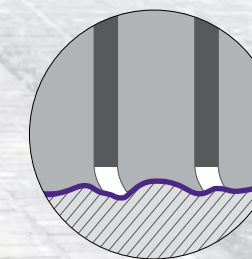

The Wave-type 2D sipe

The wave-type 2D sipes are applied to the shoulder area of the tire to maximize the snow grip and deliver impressive cornering performance.

The linear shape 3D sipe

The high density application of the linear 3D sipes ensures safety and grip due to enhanced contact area.

Flexible rubber technology

Impressive grip all year round – the enhanced flexibility of the tire, due to the silica compound used, ensures driver safety and comfort on any road conditions, even in winter.
