---	---

When the Blue that represents rational value and the Red that represents emotional value meet, the Violet of Laufenn is born. Laufenn provides smart consumers both practical value and satisfaction.

Laufenn ensures an exceptional driving experience through optimized performance – In any weather or in any season, rain or snow, summer or winter.

Laufenn provides the performance you need over a wide range of conditions – in your everyday life, under any road conditions, on or off-road.

Confident

The ability Laufenn provides is rooted in its uncompromising commitment to quality. When you go to work or head out to meet your friends... When you go on a trip or venture out to a new place... Laufenn is there with you everyday providing optimized performance and confidence.

Simple

Laufenn is Simple – with no add-ons and nothing to spoil your driving experience. Committed to the basics, Laufenn offers a pure driving experience tailored to your needs.

Open-minded

Laufenn refuses to accept an one-size-fits-all attitude. You know value when you see it and are determined to embrace new choices. Making Laufenn your choice is transforming your own value into a new trend.

Sensible

Laufenn understands your refined taste. You have an extraordinary eye for quality – all at a glance. Your choices are always solid. Laufenn expresses your excellent style and represents your fashionable personality.

G FIT 45

All Season Multi Performance Tyre

Dry

Wet

Snow

The G FIT 4S is the ideal choice for drivers looking for top-of-the line performance and safety all year round, whatever the weather.

FEATURES

**- Hybrid Performance
(Dry & Wet & Snow) :**

Optimized driving performance under any weather condition

**- Multi Safety
(Braking & Steering) :**

Ensured safety with improved grip and steering control

- High Grip Silica Compound :

Improved wet performance

G FIT 4S

Speed Symbol : T, H, V, W, Y

S.W. : 155-235

Series : 40-80

Rim Diameter : 13"-18"

EU Label : Wet "B" / RR "C-E"

Hybrid Performance

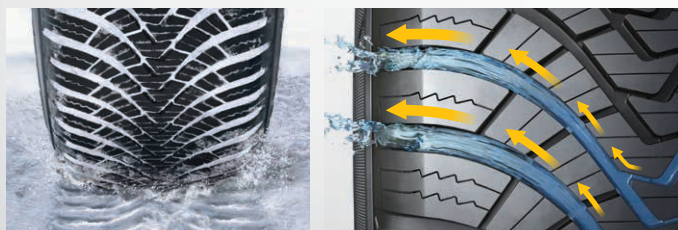

Dry Wet Snow

A tread pattern that guarantees optimum performance in various driving environments for every season under any weather conditions.

Wider Aqua Grooves for Accelerated Drainage

The streamlined aqua lateral groove, which expands in area in the direction from the center to the shoulder (out), enhances drainage on snow-covered or rainy roads by accelerating the flow of water.

Interlocking Center Block for High Speed Driving Stability

Blocks interlocked in the center secure the block stiffness. This provides drivers to feel the stability when driving at high speed on either dry or wet road.

Multi Safety

Braking Handling

A semi-groove design with sipes of various shapes applied to improve grip and steering performance in any weather condition.

Angled Semi-Groove for Enhanced Grip and Stability

Semi-grooves with a customized design forming a fan-like shape from the ground for different steering angles.

- Provides stable grip by maximizing the edge effect of the grooves for different steering angles.

2 Different Type Sipes for Better Handling and Traction

Delivers satisfactory performance in both dry and snowy conditions due to the application of differently shaped sipes to the center and the shoulder.

- Operable in DRY/ICE conditions due to the high-density application of linear 3D sipes to the center.
- The "wave-type 2D sipes" with differential waves are applied to the shoulder area to maximize the edge effect to ensure enhanced snow grip, in addition to the interlocking effect to deliver improved cornering performance.

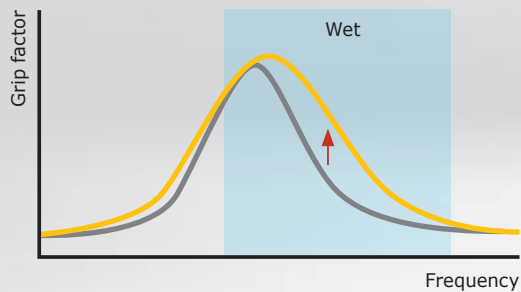

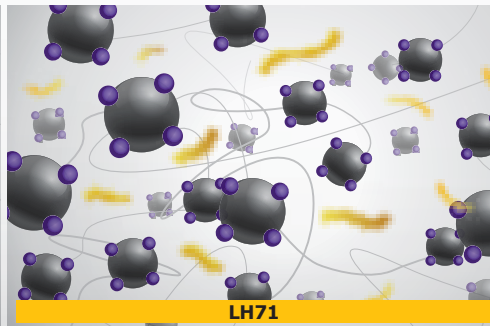

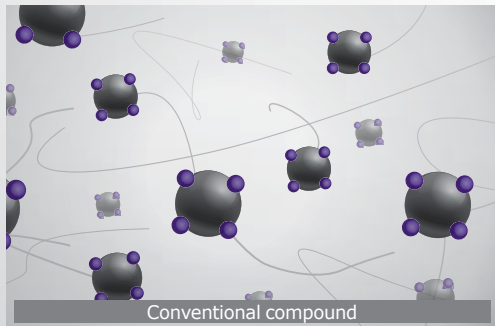

Innovative Silica Compound Technology

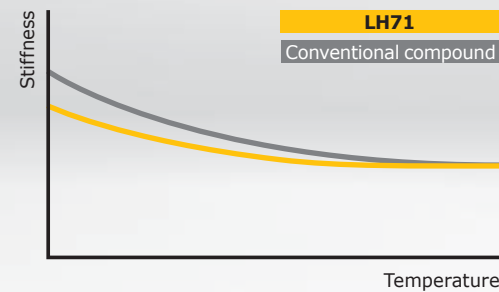

High Grip Silica Compound

This cutting-edge silica compound, the ingredient of which is from nature, provides improved performance on wet and snowy roads. The compound mixing technology of Hankook Tyre is applied.

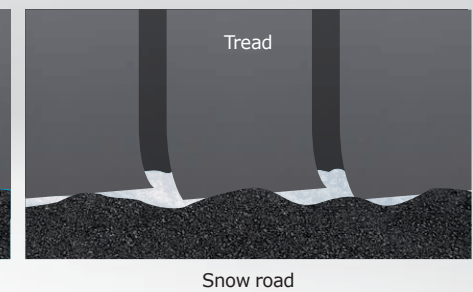

— Polymer ● Enhancing Additives — Natural Oil

The advanced mixing technology for silica and enhancing additives provides a better wet grip.

This new compound ensures rubber matrix flexibility in a wide range of temperature.

Better grip on wet and snow road

Maximising wet and snow grip by adopting highly refined resin.

TYRE STRUCTURE

G FIT 4S adopts new technology for the safe and comfort driving environments under any weather conditions.

High Grip Silica Compound

—
Improves wet and snow performance.

Wide Steel Belts

—
Ensure optimal tread stiffness for improved handling performance.

Equilibrium Carcass Line

—
Minimizes the slide deformation and ensures side stiffness.

Adoption of High-hardness Bread Filler

—
Improved handling and steering response.

Jointless Full Cover

—
Maximizes the tyres contact with the road for improved handling and tread life.

Folded Belt Edge Tape

—
Improved belt durability by folding belts.

Strong Single Strand Bead Wire

—
Improved uniformity and durability of the bead portion.
