FEATURES

- Improved Mileage
- Wet Grip

Property

-  All Season
-  Trailer Axle
-  Compound

Benefit

-  Mileage
-  Wear Life
-  Wet Grip
-  Traction

A Brand by Hankook

Designed and produced in Hankook's state-of-the-art, ISO-certified facilities for consistent, high-tech quality.

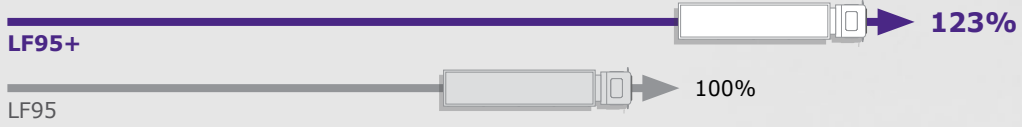

Upgraded Compound for Extended Mileage

LF95+ features a new rubber compound that delivers improved mileage and extends tyre life for longer-lasting performance.

Optimised Tread for Long Mileage

The combination of advanced polymers, high-structure carbon black, and optimised mixing techniques has led to better component interaction and dispersion, resulting in an increased driving range.

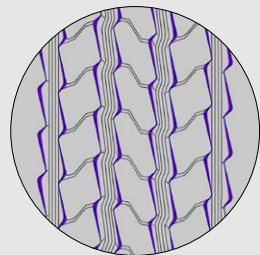

* The indicated mileage improvement is based on total driving distance (km) accumulated during these one-year field tests in Korea and Germany.

Optimised Wet Traction & Stability

Engineered tread design delivers confident handling and braking on wet regional roads, enhancing water evacuation, wet grip, and overall trailer stability.

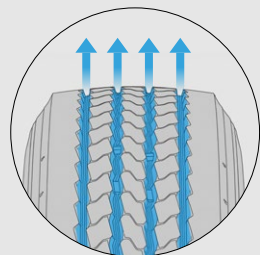

Groove slant design

Lateral semi groove

Groove Slant Design / Lateral Semi Groove

Slanted groove design helps prevent chunking and lateral grooves improve wet grip performance.

Main Zigzag Groove

Main zigzag grooves provide excellent water drainage under various road conditions.
